

## **Termite Treatment Checklist & Prior to start of treatment:**

- Please remove all belongings 3 feet from walls that will be treated.
- Please lift carpet away 2 feet from walls that will be drilled / treated.
- Please inform All-Star if you have any underground sprinklers, pipes, drains, electrical lines, oil/gas lines and location of well or cistern.
- Remove all fragile belongings from shelves, as vibrations from drilling may cause them to fall.
- Please cover all valuable belongings in areas that will require drilling to avoid dust.
- All children and pets must be kept away from work areas during treatment.
- At times, slates and /or tiles may have to be drilled for proper treatment; Evans Pest will not be responsible for cracking and/or chipping.
- Please leave windows open before and during treatment for cross ventilation.

### **After Completion of Treatment:**

- Please check all appliance (i.e. refrigerator) plugs, as these outlets may have been required for drilling.
- We recommend that you inspect the treatment areas after completion with the service specialist, and he/she will explain your treatment and answer any questions.
